

Opening Times

Friday: ^A : ^B to ^A : ^C

Saturday: ^B : ^D to ^B : ^E

Sunday: ^B : ^F to ^D : ^G

The pop-up shop opens for three periods of **exactly half an hour** in the afternoons, with the numbers of hours and minutes (using the 24-hour clock) all being **two-digit numbers**:

A can be made by doubling 1 four times

B has two digits which add up to 8, and the difference between them is 6

C is a prime number

D is the number that's one more than B

E is the number of hours in two whole days

F is an even number

G is a number that's divisible by 4 and 6, and is between 20 and 30
